*Choose your designer shape ...and we will fit it into your yard ...
Then the real designing starts, as we explore the endless possibilities.*

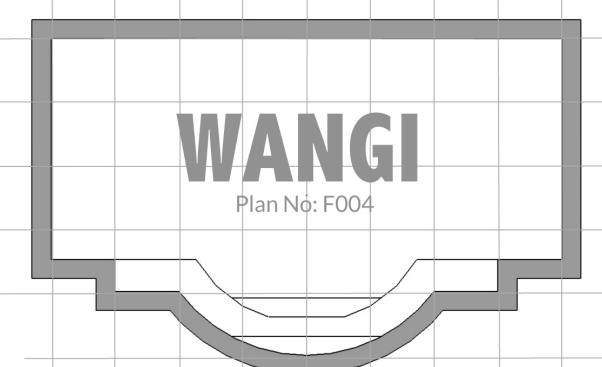

THE STORY BEHIND THE DESIGNS

Throughout history, the ratio for length to width of 1.618 has been considered the most pleasing to the eye. This ratio was named the golden ratio by the Greeks. It is thought that Leonardo (da Vinci) was the first to call it the "sectio aurea" (Latin for the Golden Section).

Our designer shapes are created to fit within the Golden Ratio 1.618 ... this design principle is found in nature and also in architecture around the globe.

What if one of these shapes does not suit your site? ... No Problems! ...
If your serious about building a pool, Our Approved plan suppliers can easily design a different pool shape that fits perfectly into your yard and lifestyle.

"Lellyn does not conform to the golden ratio, but lap pools are popular so we have included it."

THE STORY BEHIND THE PLAN NAMES

The plan names have been chosen from the world famous Kakadu National Park and its surrounds in the Northern Territory of Australia, one of the designers favourite places to visit.

www.easypoolplans.com.au

We have companies listed on our website who are approved suppliers of Easy Pool Plans swimming pool designs. They have access to clear scaled templates that can be used when visiting your site to determine the correct pool size that can be expertly fitted to your yard. This will help you see the 'bigger picture', in order to create the lifestyle you have dreamed of.
